Description

This course provides training to new administrators on the fundamental tasks of installing and configuring IBM Cognos BI, and administering servers and content in the environment. In the course, you will install and configure the IBM Cognos BI software, implement security, and manage the server components. You will also monitor and schedule tasks, create data sources, manage and deploy content in IBM Cognos Connection and IBM Cognos Administration.

Objectifs

Please refer to course overview for the objectives.

Public

This intermediate course is for Administrators.
